How to Search for Classes on CUNYfirst
Non-Degree Students

Non-Degree students are students who are NOT seeking a degree at CUNY School of Professional Studies but are enrolling in credit bearing courses. Non-degree students - visiting students who are enrolled in a Non-CUNY institution and students who are not enrolled in a degree program – can take courses at CUNY SPS to fulfill admission or program requirements or for professional or personal enrichment. If you are a visiting student, you should consult with your home college advisor to ensure that credits earned at CUNY SPS will be transferrable to your degree program.

How to search for classes on CUNYfirst:

1. Click on the following link: CUNYfirst- Search for Classes

Search for Classes

Enter Search Criteria

Start search

Select at least 2 search criteria. Select Search to view your search results.

2. Input the search criteria:
   - Institution: SCHOOL OF PROFESSIONAL STUDIES
   - Term: The intended registration semester
     i.e. SPRING, SUMMER or FALL (for winter session, select SPRING)
   - Subject: The subject of the course, e.g. BIO - Biology
   - Select “SEARCH” on the bottom of the page

Note: To populate only courses offered in the summer session, select under Additional Search Criteria - session: Ten Week or Seven Week or Three Week
3. A list of courses that fulfill the search criteria will generate. Note that some courses might have multiple sections. The length of the session can be determined under the “Meeting Dates” column.

**Summer Session- 10 week**

4. For more detail about the course, CLICK on the class number

After clicking the class number, e.g. 9541, information on the course will be listed; information such as Instruction Mode, Undergraduate or Graduate level, Textbook/Other Materials, Meeting Information (Note: if Instruction Mode is Fully Online, Days & Time/Room will be TBA), Pre-requisites, etc.

This course combines the study of human disease processes and treatments. The etiology and pathogenesis of diseases are discussed along with the application of diagnostic procedures and patient care. The pathology and underlying principles of the human systems are presented, along with characteristics of typical drugs, side effects, cautions, and interactions. Prerequisites: BIO 200
